Sage ERP Add-on Products

Sage Fixed Assets
Sage Fixed Assets solutions help eliminate redundant data entry, increase accuracy, and reduce costs while guarding against regulatory noncompliance. By combining numerous tax and accounting rules, as well as more than 50 depreciation methods and an intuitive interface, Sage Fixed Assets delivers the most complete fixed asset management solution available.

Sage CRM

Sage CRM is optimized specifically for small and medium businesses. This tool is used every day to manage critical sales, marketing and customer service activities, helping them to find new customers, close sales faster, and build lasting, profitable relationships.

Sage Intelligence
Sage Intelligence sets itself apart as a flexible, Excel-based reporting tool that is a module of your Sage ERP solution. Sage Intelligence empowers you to quickly and easily obtain the information required for improved operations and reporting across your entire business. Based on the familiar Microsoft Excel application, Sage Intelligence lets you effortlessly create reports and analyze data, improving visibility into your organization.

Sage HRMS
Sage HRMS enables you to decisively meet and respond to HR management challenges. With integrated payroll, benefits, recruiting, employee self-service, and analytics capabilities, Sage HRMS helps you to maximize every dollar you invest in employees.

Sage Payroll
Process payroll accurately and on time, every time—Sage provides a comprehensive and flexible payroll solution that allows midsized organizations to manage payroll processing in-house cost-effectively.

Sage Alerts & Workflow by Vineyardsoft
Sage Alerts & Workflow monitors your business applications and performs alerts, report distribution, and workflow based on your business conditions.

Wellspring Software PrintBoss
PrintBoss adds the intelligence to print, email, fax, and digitally file your documents anywhere on your network. PrintBoss also allows you to create checks on blank check stock.

Sage Mobile Sales
Sage Mobile Sales is an easy-to-use iPad app and service that puts the wow factor right at your sales reps' fingertips. With customer and product information instantly available, building quotes and closing sales have never been easier; you'll be amazed at what your sales reps can now accomplish.

Sage Billing & Payment
Sage Billing and Payment streamlines your accounts receivable processes and enables you to send out electronic or paper invoices, receive instant online payments, shorten days sales outstanding, and improve customer service. Give your customers the billing options they want, reduce the costs associated with mailing invoices, and get paid faster—all with Sage Billing and Payment.

Service Management
Service Management is another element of the supply chain that manages scheduling, resources, and maintenance contracts. Your technicians will deliver improved customer service with real-time customer information such as maintenance history and agreements. Dispatchers can optimize schedules by easily viewing job status, equipment and technician availability. Increasingly popular mobile solutions give technicians real-time access to customer history and current service orders.

Sage Sales Tax by Avalara
Sage Sales Tax by Avalara extends the power of your ERP with fully integrated end-to-end sales tax management automation. Cutting edge technologies and superior processing logic help manage even the most complicated tax issues, such as situs, nexus, tax tiers, tax holidays, exemption certificate management and product taxability rules.

Electronic Data Interchange (EDI)
Electronic Data Interchange (EDI) enables businesses to electronically exchange data in a standard format. By sending and receiving documents such as purchase orders and invoices through EDI, trading partners can eliminate a significant amount of time manually processing paper documents.

Sage Inventory Advisor

Sage Inventory Advisor is an affordable cloud solution that helps companies reduce excess inventory and working capital. It connects to Sage ERP data to deliver health-checks on the inventory that makes a difference to the bottom line, reduce the time spent on forecasts, and solve for the optimal investment required to achieve target fill rates.

Warehouse Management System (WMS)

A Warehouse Management System (WMS) is a crucial element of the supply chain that helps automate and manage warehouse operations. A WMS helps centralize warehouse tasks such as tracking stock locations and inventory levels. Manufacturers and distributors will increase efficiency and improve overall operations by using inbound processing, outbound processing, intelligence, and planning features of a WMS.

Sage Shipping by SmartLinc

Reduce costs while processing shipments accurately and on time, every time - Sage Shipping by SmartLinc provides a flexible solution that can help you streamline shipping activities for all Parcel Carriers, Less than Truckload (LTL) shipments, Truck Load, and Company Vehicles for Canadian and USA carriers.

Electronic Document Management (EDM)

Using Electronic Document Management (EDM) integrated with your ERP system allows you to archive, retrieve, and process documents by automated workflows. EDM will help streamline your day-to-day tasks by allowing you to search and process documents with just a few clicks.
